

PERSONA

Ghosting Greg

Skeptic Non-Buyer

VRpatients Brand Foundation · Audit date 2026-05-22 · v2 · Locked palette
2026-05-25 · Run 6 of 6

Confidence tags [BEDROCK] evidence-locked [CRM-BACKED] CRM-supported [ASSUMPTION] needs human input

1. Identity

Ghosting Greg is the silent non-buyer in the New Business pipeline — he attended the demo, didn't argue, and went dark. He is the modal shape of a lost deal, not the loud-objection skeptic the literature describes. [ASSUMPTION]

Handle self-resolved without prior Sylo sign-off. Anchored to the dominant CRM behavior: 79 of 187 NB closed-lost with a tagged reason (42%) = “No Response.” See S1 for the deeper question of whether this persona is a discrete person or a stance.

2. Role Type

Buyer or Buyer + Influencer who never became a champion. Most often a stance Tasha / Paula / Dale / Carla / Riley adopt when evaluation goes sideways. [ASSUMPTION] Touches the platform mainly through demo, rarely a trial — only 3.2% of closed deals pass through “In Trial” (Tasha Q14). [CRM-BACKED]

3. Snapshot

- **Behavior.** Silence beats stated objection. 42% of tagged NB lost = No Response; 30% have no lost-reason tag at all. [CRM-BACKED]
- **Setting (N=146 sub-industry-tagged NB losses).** 32% Community College, 32% operational EMS (county / fire / municipal), 14% University, 3% HS, 2% Hospital. The web's “community-college nursing” framing covers half the pool. [CRM-BACKED]
- **Segment skew.** Nursing 17% decided-win rate vs. EMS 31% (N=84 won / 269 lost, NB). More Gregs in Nursing. Dale D2 owns WHY. [CRM-BACKED]

- **Tech comfort.** Variable. Silence is not always tech-driven; budget timing and procurement caution show up roughly equally. **[ASSUMPTION]**

4. Goals

- **Functional.** Defend a hesitant no or polite not-yet without inviting follow-up. **[ASSUMPTION]**
- **Emotional.** Avoid buying something the program won't actually use — has seen prior sim die in a closet. **[CRM-BACKED]**
- **Social.** Not be the person who championed a vendor that flopped. **[ASSUMPTION]**

5. Pains (ranked, most acute first)

1. **(Social) Doesn't want to argue — goes dark instead of replying with a reason.** Modal NB-lost behavior. Greg's most acute pain is being asked to articulate a no he can't fully defend. **[CRM-BACKED]**
2. **(Functional) Budget timing — money isn't in the fiscal cycle.** Grant didn't land, or boss said wait. 18% of tagged NB lost = Limited Budget. CRM verbatim: “No funding at this time” (Long Beach), “Boss told him to hold off, will be at least another year” (Allina), “I did not get the grant this year” (Cape Girardeau). **[CRM-BACKED]**
3. **(Functional) Already shopping a competitor with a louder content story.** 15% of tagged NB lost = Competitor. Named in CRM: SimX 7+ times; Intulect once; UbiSim zero. Lost-to themes: peds, multi-patient/multiplayer, NPCs, unlimited-user pricing. **[CRM-BACKED]**
4. **(Emotional) Has been burned by VR or sim before.** CRM: “The instructors are sticking to what they know” (Utah Tech), “I do not have the capacity or support to integrate VR” (Walsh), “The training officer just wants to do training live in person” (Tri-Village). **[CRM-BACKED]**
5. **(Financial) Per-seat pricing doesn't fit a flat operating budget.** CRM: Mt. Juliet cited SimX unlimited-users as decisive; Honoka'a HS calculated “\$5–600 per student” as not justifiable. Small-N but pointed. **[ASSUMPTION]**

6. What They've Tried Before & Why It Failed

- **Manikin sim** (Laerdal SimMan ≈ \$118K + \$18K service). Works. Greg doesn't see why VR layers on top — and the manikin was capitalized, while VR is a recurring software line. **[ASSUMPTION]**
- **Wolters Kluwer + SimX bundle.** South College CRM verbatim: “the tie with Wolters Kluwer makes it easier to tie premade scenarios into their curriculum rather than creating scenarios on their own.” Wins on premade depth; loses on customization. **[CRM-BACKED]**
- **Static online CE** (FOAMfrat, NAEMT RECERT) on the EMS-Greg side. Cheap, CAPCE-accredited, low-engagement. Riley R2 covers VRpatients CAPCE status. **[ASSUMPTION]**
- **Doing nothing.** Default low-friction option Greg can defend. **[BEDROCK]**

7. Trigger Events (when Greg becomes addressable)

- **Manikin failure or replacement-cost spike** opens a funding window (Cape Girardeau, Lethbridge). **[CRM-BACKED]**
- **Budget cycle aligns** (Perkins V, state EMS grants, FEMA AFG for fire-only). Recurs in Limited Budget free-text. **[CRM-BACKED]**

- **A peer program adopts VR audibly.** [ASSUMPTION]
- **Accreditation site visit within 12 months** (ACEN/CCNE; CAAHEP/CoAEMSP). Literature-prominent. [ASSUMPTION]
- **Pediatric MVP ship** (Tasha Q1, 8–12yo active testing). May convert peds-blocked Gregs; re-engagement-list status open. [ASSUMPTION]

NOT triggered by NCLEX drops, NCSBN 50% rule, or CoAEMSP audits in CRM — zero mentions in 95+ free-text lost comments. Literature speaks past Greg. [ASSUMPTION]

8. Objections (top 3, categorized)

1. **“We just don't have the budget right now.”** — Wrong timing. Dominant tagged reason after No Response. 34/187. Often masks champion-can't-sell-it dynamics (Trap 1: CRM tells WHAT, not WHY). See S5. [CRM-BACKED]
2. **“You don't have pediatrics” / missing features for our setting.** — Won't work for me. 4 deals coded Missing Features; vivid free-text: hospital fidelity (Sunnybrook: “call light/button, monitor, charting”), peds (Texas Tech UHSC El Paso), no multi-patient/multiplayer/NPCs (Vocational Ed Board). Peds MVP active (Tasha Q1). [CRM-BACKED]
3. **“We're going to try another platform.”** — Won't work for me / don't trust the vendor. 28/187 Competitor losses. SimX is the dominant named winner — battlecard should be SimX-anchored, not UbiSim. [CRM-BACKED]

9. Watering Holes (named, specific)

- **Nursing-side.** INACSL Annual Conf. + HSSOBP®; SSH IMSH; NLN Education Summit; NCSBN. [BEDROCK]
- **EMS-side.** NAEMSE Symposium; NAEMSP Annual; CoAEMSP / CAAHEP accreditor communications; state EMS grant offices. [BEDROCK]
- **Operational EMS.** IAFC, IAFF channels; agency training-officer networks; FEMA AFG announcements. [ASSUMPTION]
- **Community hub.** HealthySimulation.com — vendor-adjacent water cooler. [BEDROCK]
- **Skeptic VOC.** r/ems, r/nursing, allnurses.com — cynicism vocalized away from vendor earshot. Specific phrasing unverified. [ASSUMPTION]
- **Veto channels.** Procurement; IT/security (Meta Quest fleet management); accreditation officers. Role distribution un-validated (hs_buying_role 0% populated — Tasha Q13). [ASSUMPTION]

10. Voice of Customer

CRM-verbatim from lost-deal comments (N=46 NB closed-lost with lost_reason_comments populated). Tags indicate evidence level on whether the quote itself is verbatim from a VRpatients customer.

“No funding at this time.”

Long Beach City College, CRM-verbatim • [CRM-BACKED]

"Boss told him to hold off on VR research for now, will be at least another year."

Allina Health, CRM-verbatim · [CRM-BACKED]

"The instructors are sticking to what they know."

Utah Tech University, CRM-verbatim · [CRM-BACKED]

"I do not have the capacity or support to integrate VR technology or new products."

Walsh University, CRM-verbatim · [CRM-BACKED]

"Seems they were just shopping pricing. Closed out. No response after we provided pricing."

UT Arlington, rep-paraphrase · [CRM-BACKED]

"VR is a toy. / Manikin doesn't fight you."

Web-imported from allnurses / EMTLIFE; not VRpatients-customer-verbatim · [ASSUMPTION] Replace via S10

Plausible 11pm Google search: "SimX vs VRpatients community college" / "does VR sim replace clinical hours nursing" / "CAPCE accredited VR simulation EMS." **[ASSUMPTION]**

11. Before / After

BEFORE VRpatients works

- Greg sits through a demo, doesn't ask the hardest question (peds, pricing model, multi-user), thinks privately "this won't land internally," doesn't reply.
- Deal sits 6+ months and closes as No Response. ~42% of tagged NB losses follow this shape. **[CRM-BACKED]**

AFTER VRpatients works

- Greg has a clean reason to say no (rep-captured with specificity, not stuffed into Limited Budget); a clean re-engagement trigger 6–12 months later (peds MVP, peer adoption, budget alignment).
- A procurement-friendly pricing tier (per-program / unlimited-user alongside per-seat; capitalizable headset bundle); a SimX-anchored competitive counter-narrative — not UbiSim-anchored. **[ASSUMPTION]**

The gap is honest disqualification + addressable re-engagement, not feature-by-feature persuasion. Greg's silence is the signal. The goal is converting silence into a captured reason, then converting that reason into a future-touch trigger.

12. Confidence Ledger

[BEDROCK]

[CRM-BACKED]

[ASSUMPTION]

- No Response is the modal NB lost outcome (42% of tagged, N=187).
- Nursing loses ~2× the EMS rate (17% vs. 31% decided-win, N=84/269).
- SimX (not UbiSim) is the dominant named competitor in lost-deal comments.
- Lost-reason distribution N=187: No Response 42% / Limited Budget 18% / Competitor 15% / Not Interested 13% / System Capabilities 5% / Other 4% / Missing Features 2%.
- Sub-industry N=146: CC 32% / op-EMS 32% / Univ 14% / HS 3% / Hospital 2%.
- Lost-deal comment corpus N=46 is richest VOC source available.
- Whether Greg is a discrete persona or a stance (S1, load-bearing).
- Where in funnel ghosting happens (S2).
- Peds weight in silent population (S3).
- Cybersickness / NCSBN 50% / 85% burnout / NCLEX pressure: zero CRM signal.
- Pricing-model competitive impact only 2 data points (S5).
- 30% untagged loss-reason caps quantitative precision (S11).

Open Questions Routed to Team

Full traceable list in brand/personas/persona-audit-open-questions.md → “Ghosting Greg” section.
Summary by team:

- **Leadership.** S1 — Is Skeptic a discrete persona or a stance? Third independent audit (Dale D7, Riley R11, now S1) — single decision serves all three.
- **Sales.** S2 funnel-stage of ghosters · S4 faculty resistance vs. champion-fail · S7 cybersickness as pre-purchase objection · S8 “Not Interested” recoverability · S11 untagged-30% concentration.
- **Customer Success.** S3 peds in silent pop · S4 cross-tag · S10 VOC verbatim cross-persona extraction from 46-comment corpus.
- **Product.** S5 per-program / unlimited-user pricing + capitalizable headset bundle · S6 missing-features ranking.
- **Marketing.** S9 INACSL giveaway as lead-gen · S10 cross-tag.

Composite persona — no single named customer used as basis. Aggregate patterns only. Pre-questionnaire base draft; not for promotion to outputs/final-deliverables/ until sales / CS / product questionnaire closes [ASSUMPTION] gaps.
